

## Director MedTech Cardiovascular IT solutions

**(Netherlands, EU work visa possibility)**

### Description

Hoppeexecutivesearch is looking for engineers at Master's and doctorate level with experience in Computer Vision, Machine Learning and Deep Learning.

Hoppeexecutivesearch offers jobs in Europe and around the globe with leading and innovative clients. We supply to highly international teams in corporate research.

### Requirements

As a Director international IT solutions for the product group cardiology (in particular: catheter, coronary, valve) at this innovative organisation, your role has high exposure and seniority in the team. Your profile:

- You have a Master's or a doctorate degree in Computer Science, Medicine or the specialisation Medical and Biomedical imaging;
- At least 5+ years as a product manager in the area of MedTech.
- You are preferably from one of the best institutes: University of Amsterdam or Nijmegen Radboud UMC/Donders, UMC Utrecht, ETH Zurich, Imperial College London, TUMunich; Cambridge Addenbrookes/Wolfson, Universitat Politecnica de Catalunya, USC Stevens NI&I Institute, Hamburg University of Technology, Seoul National University, University Lyon;
- You follow and/or contribute to world class medical imaging publications and seminars ECCV/ICCV, MIA/MIDL, CVPR, MICCAI, ISMRM, SCAI group;

You will:

- Set the longer term IT product roadmap for the product groups, to the level of acknowledgement by leaders in the field (clinical, IT, innovation);
- Have responsibility for the entire Product Lifecycle that consist of a combination of IT solutions and physical clinical instruments. Contribute to business cases, price setting, channel strategy, and marketing.
- Present the vision to senior stakeholders within the ecosystem of Hospitals and start-ups globally;
- Maintain the main KPI's for this product groups, force strategic partnerships with third parties.

### Benefits

You will make visits to our international offices abroad also, and participate in leading conferences. You will be based in the Netherlands, with close links to some of the leading (Dutch, European and USA) medical research institutions.

- Location: Netherlands. Some international travel also.
